PROFESSIONAL SUMMARY

Full-Stack MERN Developer and B.Sc. Computer Science final-year student with 6+ months of internship experience and hands-on freelance client work. Specialized in building production-ready web applications — from RESTful APIs and JWT authentication systems to SEO-optimized frontends deployed on Vercel and Render. Comfortable owning full project cycles independently, from client requirements to live deployment.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern | Zenith Studio, Suravika Technologies Pvt. Ltd

Hyderabad | Remote | Aug 2025 – Dec 2025

- Designed and developed responsive front-end interfaces using React.js, Tailwind CSS, and vanilla JavaScript; reduced page load time from 4s to 1.5s (62% faster) through component-level rendering optimization and code splitting.
- Built and integrated RESTful APIs with Node.js and Express.js, implementing JWT-based authentication and role-based access control.
- Managed MongoDB databases including schema design, indexing, and CRUD operations for a multi-user appointment management system.
- Collaborated with a cross-functional team using Git workflows (branches, PRs, code reviews) to ship features on a defined sprint cycle.

Freelance MERN Stack Developer | Self-Employed

Dec 2025 – Present

- Delivered full-stack web applications for clients in e-commerce, pharmaceuticals, and home services — from requirements gathering to live deployment.
- Integrated payment gateways (Razorpay/Stripe), contact form backends, and third-party APIs across multiple client projects.
- Configured custom domains, SSL, and deployment pipelines on Vercel, Netlify, and Render; all projects remain live and in active use.

PROJECTS

AruhKoncepts — Interior Design Website | [Live Link](#)

Tech Stack: React.js, Node.js, custom domain deployment

- Engineered a performance-optimized frontend achieving fast load times with lazy loading, code splitting, and image optimization.
- Implemented SEO best practices (meta tags, structured data, sitemap) improving search engine indexation.
- Integrated a backend contact form with email notification; successfully deployed with custom domain configuration.

InterviewPilot AI – AI-Powered Interview Preparation Platform | [Live Link](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, bcrypt, Gemini AI, Puppeteer, PDF-Parse

- Developed a full-stack AI-powered interview preparation platform using the MERN stack, featuring secure JWT authentication, protected routes, bcrypt password hashing, and cookie-based session management.
- Integrated Google Gemini AI to analyze uploaded resumes and job descriptions, generating personalized ATS compatibility reports, behavioral interview questions, and technical interview insights.
- Implemented PDF parsing and AI-driven resume optimization, enabling users to upload resumes, receive actionable improvement suggestions, and download AI-enhanced resumes in PDF format.
- Designed and built RESTful APIs with Express.js and MongoDB for user authentication, interview management, resume processing, and AI report generation with robust error handling and input validation.
- Deployed the application using Vercel (Frontend) and Render (Backend) with CORS configuration, environment variable management, and production-ready architecture.

Revive — Auto Studio & Car Garage Website | [Live Link](#)

Tech Stack: React.js, Node.js, custom domain

- Delivered a client-facing business site with responsive design, service catalog, and backend contact form.

- Engineered a performance-optimized frontend achieving fast load times with lazy loading, code splitting, and image optimization.
- Implemented SEO best practices (meta tags, structured data, sitemap) improving search engine indexation.
- Integrated a backend contact form with email notification; successfully deployed with custom domain configuration.

NIV Pharma — Import & Export Corporate Website | [Live Link](#)

Tech Stack: React.js, Node.js, SEO optimization, Vercel deployment

- Designed and built a professional corporate site for a pharmaceutical organization to establish digital presence.
- Applied on-page SEO including structured data and canonical tags; confirmed indexation via Google Search Console.

JobTracker — Full-Stack Job Application Manager | [Live Link](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built a full CRUD application allowing users to track job applications by status, company, and role with a clean dashboard UI.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, Mongoose

Databases: MongoDB, MySQL — schema design, indexing, CRUD operations

Tools: Git, GitHub, Postman, VS Code, Npm, Vercel, Netlify, Render

Deployment & Web Services: Custom Domain Configuration, SSL Setup, Professional Email Setup (cPanel/Zoho), Google Search Console, SEO Indexation

Concepts: MVC Architecture, OOP, Component-Based Architecture, SEO Optimization

EDUCATION

B.Sc. Computer Science

GD Rungta College of Science and Technology | Jul 2023 – Apr 2026 | Bhilai, Chhattisgarh, India
